

CARBON REMOVAL PURCHASE AGREEMENT

Stripe, Inc., a Delaware corporation (“Stripe”), and Lithos Carbon, Inc. (“Company”), hereby enter into this Carbon Removal Purchase Agreement (“Agreement”) effective June 30, 2022 (“Effective Date”).

1. Background

Stripe is paying funds to various third parties that are pursuing projects to remove carbon dioxide and other greenhouse gas emissions in the atmosphere for itself and/or as part of the advance market commitment known as “Frontier” (“Commitment”). As part of Stripe’s Commitment, Stripe may purchase carbon removal and carbon sequestration services from various third parties and Stripe may provide research and development funding to such third parties to continue to advance the carbon removal and sequestration field. For third parties that successfully deliver on Stripe’s carbon removal purchase and advance their research project, Stripe may commit to future carbon removal purchases. For purposes of this Agreement, “Frontier” includes Frontier Climate Management, LLC, Frontier Climate, LLC, and their respective affiliates and members.

2. Carbon Removal Purchase

Stripe will pay Company within forty-five (45) days after the Effective Date to (a) \$320,000 USD remove and store 640 metric tons of carbon dioxide by May, 2024, and (b) \$180,000 USD to advance Company’s carbon removal and sequestration technology (together, the “Carbon Removal Purchase”). The terms and conditions of the Carbon Removal Purchase are set forth in Exhibit A, which is hereby incorporated by reference.

The project application detailing the activities by which the Company will complete the Carbon Removal Purchase (the “Project”) is available on <https://github.com/frontier/carbon-removal-source-materials>.

3. Use of Funds.

Company agrees to use funds paid by Stripe solely for the purposes outlined in this Agreement. Use of any portion of the funds for any other purpose requires prior written approval by Stripe. Company agrees to repay Stripe any portion of the funds paid by Stripe that (a) is not used for the purposes set out in this Agreement; or (b) represents the proportional amount by which Company fails to complete the Carbon Removal Purchase (provided, however, Company will not be deemed to have failed if it (i) has used all commercially reasonable efforts in good faith to complete the Carbon Removal Purchase and (ii) is unable to remove and store carbon dioxide for all other customers of Company). Company agrees that it will not use any of the funds paid by Stripe to: influence legislation or election; conduct or support any illegal activities, and/or; provide funds to any country, organization, entity, or person embargoed or blocked by any

government, including those on sanctions lists identified by the United States Office of Foreign Asset Control. Company agrees it will comply with applicable law.

4. Interim Milestones

Exhibit A lists milestones that Stripe anticipates will be required for Company to achieve the conditions defined in Section 5 below; these milestones will assist Stripe and Company in understanding Company performance throughout this Project.

By May, 2024, as part of the completion of the Carbon Removal Purchase, Company will furnish a written report to Stripe outlining: (i) how funds were used to contribute to the removal of carbon dioxide; (ii) how many tons of carbon dioxide were removed and at what cost; (iii) proof of tons removed; and (iv) a narrative description of Company's progress and challenges to completing the Project. Company shall provide Stripe with copies of any research or publications that it produces in connection with the Carbon Removal Purchase and Project.

5. Future Carbon Removal Purchase

Upon all of the renewal conditions set forth in Exhibit A being met, Stripe, or an affiliate thereof, for itself or in connection with Frontier, may enter into negotiations for a new offtake agreement to purchase at minimum 1,000,000 USD worth of additional carbon removal and sequestration services from Company ("New Carbon Removal Purchase").

Any New Carbon Removal Purchases, whether by Stripe or another member of Frontier, shall have a price/ton that is the lowest available price (Most Favored Nation pricing) provided to any purchaser or prospective purchaser at the given volume level prior to or at the time of negotiation. Payment will be provided upon delivery of the additional volume.

6. Publicity.

- a. Stripe will draft a public announcement of the Carbon Removal Purchase for review and approval by Company, such approval not to be unreasonably withheld. After Stripe has publicly announced the Carbon Removal Purchase and funding of the Project (the "Announcement"), both parties agree that either party may disclose the terms included in the Announcement and all information about the Carbon Removal Purchase and Project other than Confidential Information to third parties without the other party's consent (provided for clarity, that each party shall maintain the confidentiality any Confidential Information). "Confidential Information" (i) is information that is identified as confidential or proprietary or that, given the nature of the information or the manner of its disclosure, a reasonable recipient would understand to be confidential or proprietary (including all information relating to the disclosing party's technology, business plans, marketing activities and finances) and (ii) shall exclude any information required to be disclosed by applicable law.
- b. Company also grants Stripe the right to use Company's logos, marks, and research

materials/reports provided to Stripe, in relation to any discussion by Stripe to Stripe's climate initiatives and/or when referencing Stripe's Carbon Removal Purchase or Project funding. Company agrees to the Stripe Marks Usage Agreement (available at: <https://stripe.com/marks/legal>). Either party may limit or revoke the other party's ability to share this Agreement or its terms or use the granting party's logos and marks at any time. Prior to the Announcement, Stripe may share the terms of this Agreement with its employees, financial partners, and contractors with a need to know such information, as well as expert reviewers and journalists. Notwithstanding anything to the contrary herein, Stripe shall be permitted to share this Agreement with Frontier and its founding members.

7. Project Review and Records.

In order to confirm the Carbon Removal Purchase was completed, that Project funds were used for purposes outlined in this Agreement, or to confirm Company did not breach this Agreement, Company will permit representatives of Stripe (or one of its affiliates, including, without limitation, Frontier) to visit Company's premises and review Company's activities with respect to the Carbon Removal Purchase and Project, to include viewing the Project. Company agrees to provide Stripe with any information that Stripe determines it needs for accounting or tax purposes or to comply with applicable laws.

8. Termination.

Either party may terminate this Agreement upon a material breach of this Agreement by the other party if such breach has not been cured within thirty (30) days' of notice of such breach, in which case any unused funds and/or funds used in breach of this Agreement must be returned to Stripe within thirty (30) days of termination.

9. Indemnification and Limitation of Liability.

Company will defend Stripe from and against any claim by a third party to the extent the claim is related to Company's acts or omission. Each party's and its affiliates' total liability to the other party and its affiliates for all claims in the aggregate (for damages or liability of any type), shall not exceed the amount actually paid by Stripe under this Agreement.

10. Applicable Law.

This Agreement will be governed by the laws of the State of California and the United States without regard to conflicts of laws provisions thereof, and the jurisdiction and venue for actions related to the subject matter hereof will be the state and federal courts located in San Francisco, California and both parties hereby submit to the personal jurisdiction of such courts.

11. Assignment.

This Agreement will bind and inure to the benefit of each party's permitted successors and

assigns. Neither party may assign this Agreement without the advance written consent of the other party, except that either party may assign this Agreement in its entirety to an affiliate, or in connection with a merger, reorganization, acquisition, or other transfer of all or substantially all of such party's assets or voting securities to such party's successor. Each party shall promptly provide notice of any such assignment. Any attempt to transfer or assign this Agreement except as expressly authorized under this Section will be null and void.

12. Independent Contractors.

The parties to this Agreement are independent contractors. There is no relationship of partnership, joint venture, employment, franchise or agency created hereby between the parties. Neither party will have the power to bind the other or incur obligations on the other party's behalf without the other party's prior written consent and neither party's employees are eligible for any form or type of benefits, including, but not limited to, health, life or disability insurance, offered by the other party to its employees.

13. Notices.

All notices under this Agreement must be given by email. For notices to Stripe, the email address is notices@stripe.com, and for notices to Company, the email address is

[REDACTED]

Notice is effective one business day after sending the email.

Exhibit A

Funding Today		
Purchase	Description	Stripe, Inc. ("Stripe"), for itself as a member of Frontier, will purchase 640 tons of carbon dioxide removal from Lithos' first commercial scale application of their basalt amendment technology.
	Amount	\$320,000
	Type	Capture + Storage
	Net metric tons removed (% of tons avail)	640 t/CO2 (100% of tons available from select deployments)
	Price per ton	\$500
	Price description	<p>This represents higher initial costs associated with deployment through small scale co-op trials, last-mile transport cost variability, revenue sharing with farmers, and greater initial sampling density.</p> <p>Over time, we anticipate the price reducing significantly based on economies of scale in transport, optimizing transport timing, securing commodity prices for basalt, and more cost-effective measurement.</p>
	First customer?	Yes
	Largest customer?	Yes
	Est delivery start	October 2022
	Est delivery completion	May 2024
R&D	Interim milestones The exact path to delivery may vary, but we anticipate these steps will be important markers of progress toward delivering carbon removal.	<ul style="list-style-type: none">● May-September 2022: Deploy trial across land with diverse climates, geographies, and crop types● March 2023: Report crop yield data relative to control samples. Provide update on soil sampling resolution, estuary/river leakage and catchment-scale modeling, isotope trace experiments, and plant tissue metal content monitoring.● June 2023: Establish partnerships for feedstock distribution and agricultural deployment.● May 2024: report final CO2 removal values for each location and crop type
	Description	Grant to accelerate rigorous scientific research on the safety and measurement of carbon removal for enhanced weathering, including publication of Lithos' high-accuracy measurement, reporting, and verification (MRV) framework in collaboration with their academic institutions and broader network of scientific collaborators. This research will be peer-reviewed and published in credible scientific

	<p>journals and include:</p> <p>Coupled catchment-scale and river/estuary modeling of surface water carbonate chemistry for a range of deployment scenarios to: (1) quantify any potential loss of captured carbon due to carbonate precipitation; and (2) increase confidence that river/estuary pH values will remain within safe limits for wildlife.</p> <p>Full characterization of metal and nutrient content in crops and soil, together with crop yield analysis to verify the potential for safe, scalable CDR via enhanced weathering of basalt in row crop systems.</p> <p>High-resolution soil sampling within the MRV framework to more firmly establish the spatial sampling resolution necessary to accurately and precisely verify CDR at the field scale.</p>
Amount	\$180,000
Total funding today	\$320,000 purchase and \$180,000 R&D
Conditional Renewal	
Renewal description	<p>Stripe will enter into a new offtake agreement to purchase at minimum \$1,000,000 of additional carbon removal from Lithos' subsequent amendment applications following the fulfillment of the first purchase and achievement of the criteria laid out below. Upon triggering our renewal, we will negotiate a new price/ton which should be the lowest available price (Most Favored Nation pricing) provided to purchasers or prospective purchasers at the given volume level. Payment will be provided upon delivery of the additional volume.</p>
Renewal conditions	<p><i>Generic</i></p> <ul style="list-style-type: none"> • Delivery of 100% of initial tonnage, with measurement, monitoring, and verification (MMV) evidence of tons removed • Completion of a third-party lifecycle analysis (LCA) confirming carbon removal purchase resulted in a net-negative carbon footprint • Updated LCA demonstrating net-negativity for subsequent removal if future scaled process is meaningfully different • Updated techno-economic analysis (TEA) providing significant evidence that a sub-\$100/ton capture cost is achievable at megaton scale by 2027 and highlighting cost sensitivities. Differences between current experimental values and TEA assumptions for \$100/ton highlighted, including a plan to narrow the gap between actual and modeled performance presented. • Evidence of ongoing responsible community engagement and efforts to achieve the highest standards of safety, compliance, and local environmental outcomes • Meeting with Stripe and potential site visit upon delivery and

	<p>achievement of project-specific renewal conditions to answer any questions about the results</p> <p><i>Project-specific</i></p> <ul style="list-style-type: none">• Demonstrate predictive power of SCEPTER model validated by comparison of modeled treatment conditions for various locations/crop types and actual CDR performance• Submit scientific manuscript containing an analysis of sampling resolution and estuary/river leakage in order to increase confidence that water pH levels remain within a safe range for wildlife, and to estimate loss of carbon drawdown due to carbonate precipitation.• Characterization of metal content in plants and soil, in addition to crop yield analysis, indicates potential for safe, scalable CDR via enhanced weathering of basalt• Evidence of active, positive engagement with farmer communities as deployment partners and development of a robust strategy to address environmental justice considerations• Secure strategic partnerships for feedstock distribution and partnerships for basalt deployment at sites with amenable soil conditions
<p>Est. delivery completion Assuming the renewal triggers upon the date estimated above, when do you expect to deliver the additional \$1M of tonnage? We know there are wide error bars.</p>	Spring 2025
Minimum renewal amount	\$1,000,000 purchase
